GENERAL INFORMATION

AMS+NIS is a user-friendly premix of ammonium sulfate and surfactant designed for use with glyphosate systems or other pesticides. AMS+NIS gives fast surfactant wetting and surface tension reduction enhancing herbicide movement through the cuticle on the leaf surface. AMS+NIS helps herbicide formulations work better by guarding against hard water antagonism. AMS+NIS adds ammonium to help increase plant uptake and translocation of herbicide through the cuticle and phloem of the plant. AMS+NIS makes herbicides work better, faster and longer than many other adjuvant formulations.
