GENERAL INFORMATION

NIS is a premium surfactant and humectant that improves wetting, spreading, and humectancy of agricultural sprays on leaf, stem, and insect surfaces. It is designed for use with insecticides, fungicides, herbicides, acaricides, defoliants, desiccants, PGR's and nutritionals. NIS contains a sticker that resists re-wetting of spray deposits by dew, irrigation or rain. It also contains a defoamer that helps suppress spray tank foaming. NIS is suitable for use where the pesticide label recommends a nonionic surfactant, spreader or wetter.
